UNISON

I got to know and like the Austrian sound designer Thomas Chochola in 2006, when I visited him in his hometown in the Austrian Waldviertel.

Out of a mere business idea a friendship developed, which is based upon the following principles of the TC philosophy: Offer interested people meaningful products corresponding to the spirit of the zeitgeist.

Products which touch people – young and old – at their hearts and which support them in their daily life.

Is there anything more beautiful than following your heart ...

the power of form creating life

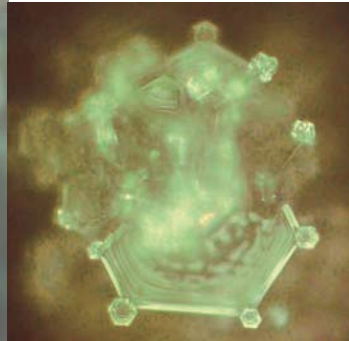

the power of form creating life

The true language
of life is vibration.

Every communication requires resonance
which is measurable through frequencies.

When people say: "This person is on
my wavelength!" they are expressing the
essence of life.

Every sound is objectively connected with
form and colour.

Every aspect of our existence is influenced
by sounds including our perception of
happiness which is shown in the
"harmonious flow between mind and heart".

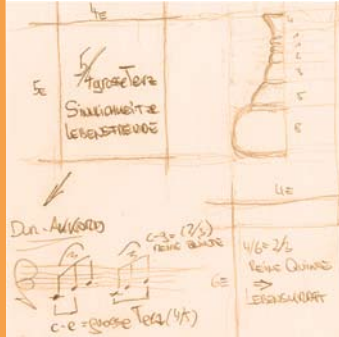

Rhythm is life

In total more than 200 rhythms influence
the harmonious interplay of the human
organism.

The wealth of forms has a major effect on
one's personal well-being.

sound design

TC composes

his designs on the piano
and converts the sounds
into measurements.

Thus, the harmonious
TC forms come into
being.

the power of form creating life

the power of form creating life

Music permeates

and brings about a sensual experience even in the motherly womb — that is warm, watery and immersed in sound.

The ear - the first organ formed - tells the embryo about the adventure of life.

Mother's voice becomes the superior and powerful authority – universal, assertive and elevated.

Music waves travel through the amniotic fluid and creates form.

TC music is based upon natural rhythms and frequencies. Thus, it serves to reduce stress and helps one to experience one's own centre.

Personal Sound

Every human being consolidates their own basic sound at the age of 18 years.

Based upon this the individual life qualities are developed.

The personal basic sound

enables everybody to activate their body and to efficiently devise their path of life.

The variety of TC designs mirrors great structural design. Fractal patterns are intertwined with cosmic frequencies.

Similar to the reception of a radio station TC designs interact with the forces of the universe and use them for the vitalization of the biologic environment.

“... in my practise I placed the TC carafe next to my essences. Now the energy of the Bachblüten increased so much, that i can barely open the bottles. - isn't that simply wonderful ?! “

brigitta gander

3 sips of water ...

Quality matters — water should contain at least 7,000 units of BOVIS to be able to remove waste products of the body. Normal tap water is weakened by the unnaturally high pipe pressure and by its journey through the straight pipes.

Mythos tumbler

artnr 6200/6210

Evolution in the glass

The design of the TC tumbler MYTHOS is based upon the Dur triad. Thus, the development of the waves of MYTHOS follows a natural law, which forms the basis of that harmonious force, used by W. A. Mozart as well as J. Sebastian Bach and which is the core of the oxygen atom, too.

All good things come in THREE

Biological life processes are carried out in three phases.
Three units in the proportion of 3:4:5 conclude an energy cycle and recreate life.

The powerful and robust design of MYTHOS can serve multifunctional uses, such as water and juices, as well, as for the preparation of a taste improved Cappuccino, or the drinking of a whiskey, which tastes like it was poured from a tumbler.

MAGIC GLASS...

1) **TRANSPARENCY** – is a fundamental component of contemporary thought. The translucent potency of glass is a symbol of the essential energy of TC designs:

An intimate knowledge of form combined with the clarity and competence of age-old knowledge.

2) **ENERGETIC MATERIAL** — In its most basic form, glass is composed from around forty percent quartz sand making it a highly energetic medium. Moreover, only lead free raw materials are used.

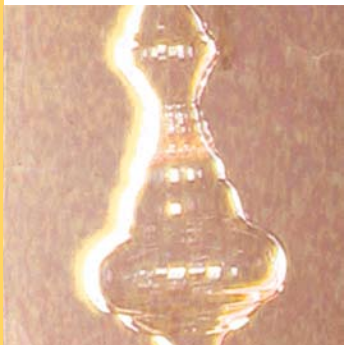

3) **TRUE TO ITS FORM**

The musical calculations of the TC shapes can still be transcribed exactly, despite the superficial hand finishing

Glass flows in and nestles gently in the still and motionless TC mould.

FIREWATER

Bringing elements together harmoniously to support man in his activities calls for alchemistic skill. A holistic understanding of chaos and order is also essential.

In nature, an increase in heat is linked with the development of a state of chaos. Chaos needs to dissolve the old order to allow new order to arise.

Should this transition into harmonious elegance succeed, then the organism experiences a lasting beneficial change and renewal of its cellular structure.

Optimal biological communication between warmth and water takes place at 36,7 Degrees C. The water formation unfolds and, while being consumed, binds itself optimally to the body's own cells.

Through this, the body can purify itself better and revitalises its efficiency in functioning.

TC & ayurveda

"Catching sight of the DELICATE carafe,
something amazing happened inside me!
From the very bottom of my heart came an
"OH" " " "

It was as elegant and disarming as a
maid - amazement, as though I had glimpsed a
beautiful young girl.

Then I knew with certainty: The shape of
the DELICATE had a particular secret
: ... was it a life flower in the base of the
carafe? No!

It was the proportions, expressed in the twists
in its neck to the ratio of 1:3:5.

This ratio is a rhythmic echo from the cosmos,
giving life and increasing life force.

In Ayurvedic pulse diagnosis we can feel the
ratio VATA 1 - PITTA 2 - KAPHA 3,
in reality, however, we are feeling
VITA 1 - PITTA 3 - KAPHA 5.

This is the true and optimal pulse ratio, and is
confirmed when we assess the pulse's prakriti.

effective power

The secret reveals

... the waves of the
TC carafe reflect **the**
ratio 1:3:5:8 and that's
where the energy and
power comes from !!!

the power of form creating life

The soft Vorticity ...
of liquids, that's what the
TC drinking straw achieves.

The „Spin“ (= rotation around its
own axis) is biophysically influential for
the life force of organisms. Even the
movement sequences of our own bodies
are performed in natural, “swinging”
circular patterns.
Life energy can be channelled through
these movements and
the liquid flowing
through can be
transfused.

The internal construction of the
TC drinking straw is a double spiral
over two complete full circle turns, which
pass information on to the liquid.

THINKING & FEELING

A harmonious bond between both halves of the brain - namely **REASON** and **INTUITION** creates competence and freedom from stress.

Peoples' everyday lives often demand decisions which need to be taken using emotional perception which is the coequal of reason, and one of the many senses available to us as humans.

Old Art of a New Time

From radiasthetic analysis, we can show that the strength of the TC fountain's form produces a strong biological vitalization, removing dust particles and bacteria from the air.

It can harmonize any electro smog pollution in a room through the natural ionisation of the oxygen in the breathable air. The energy effectiveness radius ranges from between 12 to 25 metres, depending on the size of the model.

All models are mouth blown in Austria using traditional craftsmanship. Every piece is a hand certified original and is fitted with soft lighting.

The colour **ORANGE** is very invigorating and revitalizing and warms its surroundings.

The size determines the intensity of the radius of effect.

Madonna ca. 25 m

Madonna light ca. 12 m

The colour **BLUE** promotes a feeling of community and strengthens the cooling aspect of water energy.

The colour **GREEN** promotes self esteem and reflection on personal qualities.

The colour **RED** - white promotes thrilling interludes and the power of self confidence.

The colourless model allows you to change to various colours in the ball at the top of the fountain.

CONCLUSION

I thank you heartily – but why?

For your attentive wandering in the world of TC especially in the world of shape and form, which offers an unbelievable number of possibilities for invigorating and advancing our everyday lives.

Knowledge of quantum physics flows into the development of all

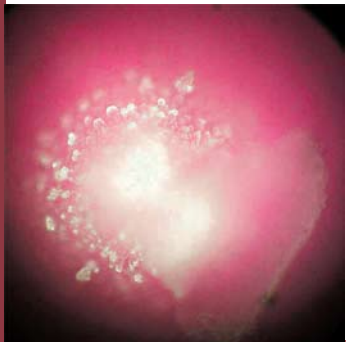

TC products as does knowledge into the power of thought, like the power of music and the collaboration of the extremes of life.

Creating consciousness regarding natural connections and, in so doing, making insights useful for everyday life is the core assignment of **TC energy design**.

TC biography

Thomas Chochola, born on 9.10.1959 in Austria, is a trained road construction engineer and studied the jazz saxophone in Vienna.

In addition, TC is a medical colour diagnostician after Prof. Lüscher and a certified multimedia marketing coach. Alongside his work in design and compositions, he leads seminars on holistic subjects and offers sound coaching, in which a personal basic note is decided on and used to promote the development of the personality.
